It's All Free!

Did you know that SERA assistance in coordination, technical help, or interference information is FREE? We do not charge for any of our services. Our operating expenses are derived solely from voluntary membership of repeater owners and users and the support of our *SERA Repeater Journal* advertisers.

In 2009, SERA enters its 38th year of operation and service in the southeastern eight states.

Our volunteers are here for you. If you have any questions about SERA, do not hesitate to call or ask. It's that simple!

help@sera.org (888) 593-5527 www.sera.org

E-mail - Hotline

To send e-mail to any SERA officer, staff member, Director, staff, *Repeater Journal* columnist or correspondent, use this address format (unless otherwise noted):

***callsign*@sera.org**

(callsign in lower case only)

Don't know who to contact? e-mail:
help.info@sera.org

or call the ***SERA Hotline:***

SERA Announces Dues Increase

We've held off as long as we could, but our costs are going up and we can't wait any longer.

At the June, 2008 board meeing in Kodak, Tennessee, the SERA board voted to increase annual dues for both Full and Associate members. This dues increase is effective with all memberships started or renewed as of January 1, 2009. The annual rate for Associate members (repeater users) will be $15, and for Full (Repeater sponsors and owners) will be $30. The single-copy cover price will increase to $5.

But, there is GOOD news!

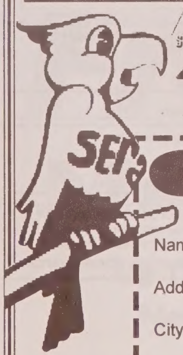
The board, after much discussion, agreed that the increase was necessary. Our postage costs for mailing *The SERA Repeater Journal* went up 30% between May and August, 2007. This was followed by another increase this year. Our printing costs have gone up: although our printer is doing a lot to hold prices down, he relates how his cost for ink alone has gone up about 500% in the past year. Although we're lucky to have some cash reserves to cushion us, SERA Treasurer Johnny Wofford, WA4ETE, reported that the organization has operated at a net loss so far this year. This can't continue for long.

The good news here is that the board agreed to allow Associate memberships to be renewed for up to two years right up until Janury 1. So, if you join or renew for two years in the next few months you'll be doing TWO good things: (1) you'll continue to support SERA, and (2) you'll save $10 over the two-year term of your membership.

So, use the coupon below (or at the end of the Repeater Index) to join or renew for an extra year or two.

What is Interference-Free Local Repeater Operation Worth to you?

Supporting SERA, your local Amateur Repeater Coordinator, makes it possible.



JOIN SERA AND GET THE REPEATER JOURNAL!

On The Cover:

Every January and June, the SERA Board gets together for a meeting somewhere near the geographic center of the eight SERA states. As NCFMA/CVRA/SERA territory has expanded westward and north-south, that point has moved to where it is now near Kodak, TN.

Tim Berry, WB4GBI provides us with a picture of the vista looking east from the WIVK-FM tower, which is home to the 146.94 repeater that SERA uses as a "talk-in" repeater on the way to the meeting.

For more information of the January meeting, please see page 42 of this issue.

Let's Look At It--- This Way !!!

Marvin Whatley, AA4YW

My literary musings are usually sufficiently different from common views to cause a chuckle or a shrug, but occasionally they differ enough that there is danger of offense. The boundary gets fuzzy, but there is no doubt about my views on education in the United States for which I offer only nominal apology.

Most people agree with me that our school system is in trouble, but few on the causes or solutions. The schools are in trouble because our society has yielded to crazy ideas about what children really are and their appropriate place in our culture. In a system with a lag time as long as a human generation it takes a while for a response to develop. When we look back a few generations we find that people who were struggling had a completely different attitude about many things including children. Life itself was not as unrealistically sacred as it is now taken to be. In wars through WWII troops were thrown into enemy fire and thousands were killed and it was the accepted cost of the battle. Toward the end of the nineteenth century a whaling ship would put out for a three year trek and it was expected that at least a third of the crew would die before it came back, but it was not hard to find a full crew of qualified sailors glad to sign on. People went about their business knowing that life was hard and they might die. The idea that if you took the work and were killed on the job your employer was obviously at fault for not making things safe had not yet been developed. Every large construction project expected hundreds of deaths. Over twenty thousand died for the Panama Canal.

During this time children were a resource to be used. At the dawn of the industrial revolution child labor was common, and this was part of life. Very wealthy families might send their children to very expensive schools. In not so wealthy families the lucky boys, before they were teens, became apprentices at some craft where they did the dirtiest and sometimes most dangerous jobs, and tried hard to keep out of trouble. Some boys and girls wound up in factories (sweat shops) doing simple, repetitive manual work for long hours. Farmers had lots of children because they were a source of labor and the kids worked hard and many died. Children from this society, however, grew to be strong and resolute adults and technology and wealth increased.

Then we passed child labor laws. But still kids knew their place: they were to be seen and not heard. My grandmother at about nine worked in a cigar factory, but my mother at that age was not permitted to work. But while my grandmother, as an adult, worked shelling beans (piece work) my mother sat at her side shelling beans because that was what children did. My mother graduated valedictorian from grammar school (she prized the little silver pin all her life) but she did not go to high school because very few got the chance and, anyway, she was a girl. Children did not expect to be part of things; the world was for successful adults. Some adults were very well off and others got nasty jobs with poor pay. But the notion that society was an entity to which blame could be assigned was still in an incipient stage and folk still accepted a gradation of the worth of individuals. The typical parent wanted his child to have a better life so he tried to produce a better adult. Education was important because it made one a "cultured" person and increased his chances. Attendance at grammar school soon became universal and everyone tried to go to high school. At this point it was still considered a privilege and if you messed up you could be expelled; the ultimate punishment was denying access to education. Discipline was not a concern as children marched in silence in single file to class. Children from this generation also grew to strong, hard-working adults and became more affluent, even in the Great Depression.

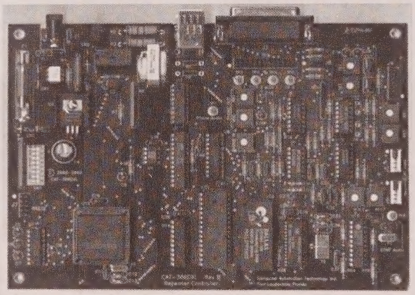
It was possible for a person to fail. If you had no skill and no one would hire you, you went hungry and you might die. This was my generation. My folks were not rich, but my mother bragged that we were never poor, and we always had meat on the table at least once a week, even if it was only a ham bone. They decided they would send me to college. I went to LSU where the tuition for in-state pupils was $29 per semester and a ticket to the meal club at the campus cafeteria was $9 a week, and I lived in the "barracks" sharing a room with three other guys. I played clarinet in the LSU marching band as a scholarship that covered the tuition, and that helped. My parents did not think they could afford the whole four years, but if I got a couple of years to my credit, my chances of getting a decent job were much better, and this was the purpose of their sacrifice. In my second year, during WWII, I volunteered for the U.S. Army Air Corps which changed everything, but that is another story.

When the twentieth century began, a child might get a toy or two for Christmas and all his toys would fit in one small box. This changed only slightly for the first thirty years. As we entered the forties it was common for a family to have indoor plumbing, a car (one car), a party-line telephone and a radio. The activities of children were inconsequential except as preparation for adulthood. Young boys wore short pants, and high school students wore knickers. A boy's first long pants were important because that meant he was becoming an adult. When he got to be 21 he could vote.

After WWII the country's attitude toward children changed drastically. The general notion that children were apprentice adults was being abandoned while I watched. In place of just a crib for the baby, there appeared whole lines of furniture and many special manufactured items. Children's activities became important: school sports, clubs, dance classes, and a variety of newly invented things. Clothing fads and high-tech toys became important and we began to see a substantial fraction of the national economy devoted to things for kids. Now the typical parent wanted his child to have a happier, more wonderful childhood than he had, which is quite different from making a better adult. It became the primary function of adults to supply children with the myriad of things that suddenly became necessary. From our modern affluence we may look to the past, which at a minimum must be credited with delivering us here, and lament that life was too little valued and that the pleasure of children too little regarded. Correction was inevitable, but was driven relentlessly and carelessly. From simple care and feeding our quest for safe, happy, well-adjusted children has become an obsession yielding beings that we can still love and dote on, but for whom we must often apologize with revised definitions for traditional

CAT-300DXL Repeater Controller

The CAT-300DXL has all the features of the very popular CAT-300DX including a full feature autopatch and a Remote Base Port.



Features Include:

human values.

It is universally accepted that a happy child makes a productive and valuable adult. There is no good evidence to support this. While studies have shown that grossly abused children often grow to criminal or worthless adults, available biographies seem to suggest that our most notable adults experienced much less than the ideal childhood popularly envisioned. No one wants to believe this. Alternatively we embrace programs that indoctrinate our children with their importance. Our schools are trying to make everyone a leader (a rather bizarre concept). Children, even small children of six or seven, are invited to speak out on world issues telling us what we should do about integration, or global warming, or foreign wars. They carry plackets and hold parades and are convinced that they have every right to do so. In this environment why would any child aspire to be an adult? He accepts adults, but sees them as generally burdened with responsibilities and unhappy, while children have everything now. Teens and pre-teens have their own culture, live in their own world, have their own definition of fun and success and tend to perpetuate it as long as they can (sometimes until they are 30 or older). Since our indulgence funnels lots of wealth to our children, large industries work this market, providing feedback to reinforce this social distortion.

On about a ten-year cycle the professional educators tell us that everything we have been doing until that time was wrong and they completely revamp the books, classrooms, and the whole philosophy of education. Computer labs seem now to be the fad. Of all the things that influence the quality of secondary education, including student-to-teacher ratio and elegance of facilities, the most important (from well documented studies) is parental background and interest. Our attempts to improve quality, particularly by such dubious devices as standardized tests, are inevitably ineffective and will be until education itself (not just passing grades) again becomes something that people want. The attitude of the nation toward academics is abysmal.

Historically an incentive for acquiring an education was the enhanced prospects of earning enough money to live well. When this was true parents pressed their kids to study. At present the relevance of education is greatly diminished because everyone, no matter how worthless, has the right to a decent life. Our modern society is supposed to be very advanced, enjoying a high-tech world. But knowing how to point and click, operate a cell phone, play "game boy", or even operate very expensive technical equipment, while requiring some mental skill and perhaps some training, has nothing to do with education. Our school system, somewhat into college, has become a gigantic baby-sitting industry where interest and participation are maintained by a condescending, carnival atmosphere and academic basics are incidental. The fraction of people who can do elementary problems in geometry or algebra is minuscule. And why read or write when you have television? When the child says he's bored with history, the parents sympathize. Why should he work at what no one believes relates to anything in the modern world? Besides, it is known that he cannot fail and cannot be kicked out. When he does poorly, it is the teacher's fault. When he graduates (and he must) society will take care of him. And, if it is not so already, the controlling majority of society will soon be comprised of the graduates of these schools.

"Six Meter Memories" (Part 2)

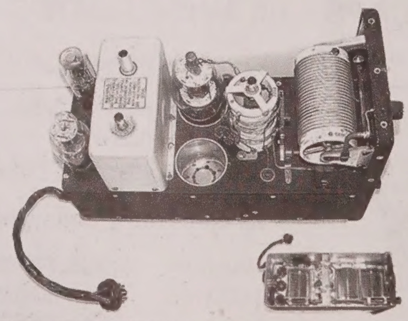
The first installment of a continuing series about early six meter memories appeared in the last issue. Part 2 of the series will delve into some finer points of upgrading and refining operation on the "Magic Band," as it's now popularly known by many. Operation on six meters back in the late 1950s and early 60s was often a challenge full of surprises. Just getting on the band frequently required home brewing and interfacing equipment. Furthermore, contending with TVI (Television Interference) was a real issue. For those chasing DX, there were "long waits" for favorable propagation. But when they did arise, distant signals from unexpected locations were the reward.

Rock Bound And The Move to VFOs

The bane and restriction for early 6 meter enthusiasts was often being frequency limited, or challenged, in the pursuit of more efficient contacts on 6 meters. Those who got on the band at an early age as teenagers, as I did, were sometimes cash limited and had just a few crystals for operation. An 8.400 mc crystal was one of the most popular rocks and was typically acquired first. Please let me describe how this lower frequency was employed in a transmitter. The 8.400 mc crystal was used in an oscillator circuit designed to emphasize and select the third harmonic (i.e. 25.2 mc) of this lower frequency. The next step, on the "journey to six meters", involved a frequency doubler to get one to 50.400 mc. Simply stated, this is the math: 8.400 x 3= 25.200 followed by the doubler (25.2 x 2 = 50.4). As resources permitted, I acquired crystals for 50.7, 50.525 and 50.1 mc. With the change to FCC rules during this period, the portion of the band from 50.000 to 50.100 was assigned for CW only operation, so I disassembled my FT-243 crystal and ground the crystal element to raise the frequency. My resultant "new" frequency, after the process, moved me up to 50.128 mc--a frequency I used for many months to work some great DX. But I was hungry to become frequency agile, and so my quest started for a suitable VFO (at a price I could afford). After some exploration, I located a surplus WW-II Command transmitter which covered the 8 mc range. The process involved some minor technical modifications to this WW-II legend, including the removal of one of the two 1625 RF amplifier tubes to reduce the drive for VFO use. I constructed a simple power supply using a 5U4 rectifier and VR-150 voltage regulator tube for frequency stability. The front panel of the power supply had an on-off toggle switch along with a control to momentarily activate the VFO for "zero beat" when selecting the frequency. This arrangement proved to be great for chasing (and working) new DX on 6 meters and, by the time I entered college a few years later, I had worked more than 40 states on 6, plus several countries.

8400 KC
TEXAS CRYSTALS
LOS ANGELES
CALIF. U.S.A.

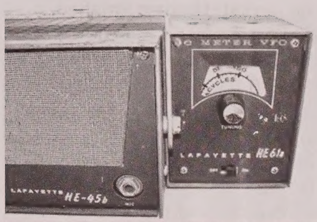
An 8400 kc crystal in a FT-243 holder. In a 6 meter transmitter, the operating frequency would be 50.400 mc after frequency multiplication.



A WW-II Command transmitter. One of the two 1625 RF power tubes has been removed to reduce the drive level. The original RF power connector has been replaced with a SO-239 female connector (far right). Circuit modifications have been made for amateur use, and an external power cable has been installed.

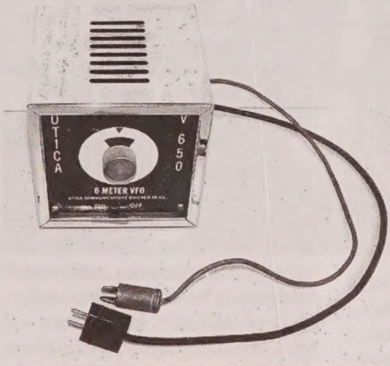
A Few Commercial VFOs

Companies were quick to capitalize on the market for commercial 6 meter VFOs. I'd like to cover just a few of those offered by entities such as Lafayette, National, Utica and Globe (because I own them, and can provide pictures with this article). The Lafeyette HE-45 was a popular transceiver because of its versatility, reliability, and low cost. It was great for both fixed station and mobile operation. The 2E26 final amplifier



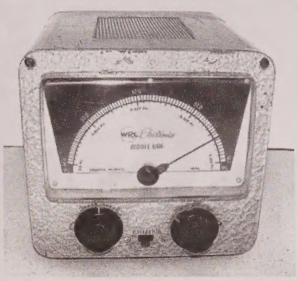
Lafayette HE61a external VFO fastened to a matching HE-45b transceiver

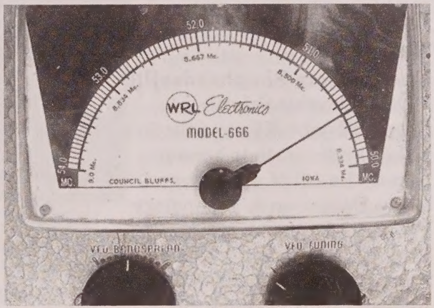
was sufficient for serious operation and the later introduction of a matching VFO only helped add to the desirability of this transceiver. Some hams (as the picture with this article shows) would even physically marry the HE-45 with the matching VFO.



A Utica model 650 VFO. Note the power plug and RF cables for connection to a transceiver

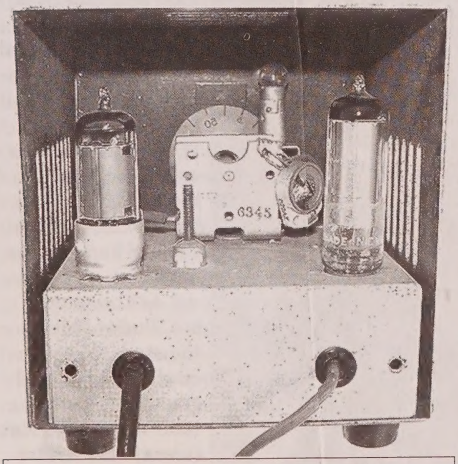
Johnson offered a great transmitter for 6 and 2 meter operation and several hams would use a National VFO for frequency agility. While two meters was not yet experiencing the popularity it now enjoys, some were starting to look higher in frequency for excitement. And the combination 6 and 2 meter transmitter was great as an incentive to explore this higher frequency band.





A close view of the WRL 666 VFO. Note the six meter frequency, along with the "base" 8.00 mc frequency, are both displayed. A VFO bandspread dial is at the bottom left. The VFO main tuning control is at bottom right. Also, note the calibrate switch (bottom center).

Another interesting VFO that was offered by WRL (World Radio Labs), the model 666, was popular with hams. This was a versatile VFO and the frequency display included both the 6 meter frequency, along with the equivalent lower “base” 8.00 mc signal frequency as a reference. The VFO also had a bandspread control and calibrate function. And let me mention a concern back then about calibration. With analog dials and the need for accurate frequency determination (along with problematic frequency drift concerns), calibration was a real issue. Some hams had receivers with either internal or external crystal calibrators to more precisely determine their frequency of operation using WWV as a “zero-beat” base reference. Another VFO, the Utica model 650 pictured with this article, was available as a companion for their six meter transceiver. This VFO was useful with other brands of equipment (as were similar VFOs offered by others).



Back view of a Utica 650 VFO. The voltage regulator tube (for stability) is on the right. The oscillator tube is on the left. Note the inside details, including the "back side" of the tuning dial.

I hope you enjoy this stroll down memory lane, through narrative and pictures. The series will continue with future articles about my early six meter memories.

Kentucky

John Farler, K4AVX

Hello From Kentucky!

"Big Project" Update from Shepherdsville

St. Aloysius School, in Shepherdsville KY, was the first school in the state to become part of the ARRL Amateur Radio Education & Technology Program (ETP), AKA "The Big Project" back in 2004, as was reported by Pat Spencer in the Repeater Journal some years ago.

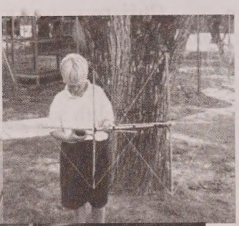
The St Aloysius Radio Club, organized by Buddy Sohl, KC4WQ, through the Bullitt County Amateur Radio Society is part of a nationwide program to spur interest in amateur radio among school-aged children. The club operates under the call W4KBR and has been involved in many activities during its lifetime.

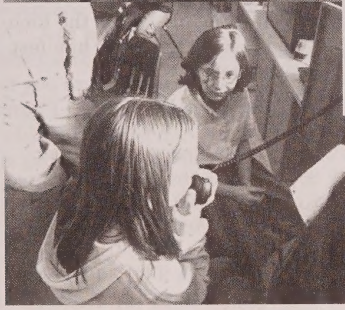
The school club participated in the School Roundup in 2005, with 351 QSO's. There were 19 club operators ranging from ages 8 to 15. Everyone had fun, learned a lot and the roundup was a great success. This group participated in 2004, and more than doubled their points over the period. Having finished in second place for a couple of years, they finished in first place in 2006.

Buddy says "The kids routinely get on the air and call CQ on 20 and 40 meters on Friday afternoons. Contacts have ranged to 49 of the 50 states and many foreign countries, paying special attention to the third party agreement. One of the most exciting contacts was OA4SS, Fr. Ed Schmidt, a Catholic missionary in Peru. He quizzed the St Aloysius kids on everything from geography to Spanish and spent a solid 45 minutes with the club."

In the past year, the club has had a tower and antennas installed. Currently the station operates a three element tribander, dipole for 40/80 meters and a 2m/70cm dualbander. All antennas, tower and equipment have been donated by the ARRL and local amateurs. On December 17, 2006 the members were the featured guests on local radio station WLCR's 'Shout it from the Rooftops' program with Mary Pat Payne. The kids were joined by telephone by venerable Rock and Roll legend Joe Walsh, WB6ACU. The kids asked Joe about his introduction to ham radio, the 'Big Project' and life as a musician.

As the sponsor, Buddy found the students quite ready to learn, and creative in putting their new knowledge to work. He relates this in the fox hunt experience. "One of





the biggest adventures for the club was a FOX hunt and the fox was elusive. The students really got into the fox hunt and came up with some novel ways to hide it, using knowledge they had learned in the club. After the initial hunt the students got to hide it from the teacher, and they got creative. Remembering some of the stories and theory as to how radio works, they found a 'creative' place to hide the fox. After a quite fruitless hunt by the teacher, who was lost within a few feet of the fox, the kids couldn't keep a secret any longer. The hiding place was under the rocks in a fenced in play area. The fox antenna was laid under the chain link fence so it coupled and the whole fenced area became a radiator. Signals were flying everywhere."

"The club meets on Fridays after school. There have been over 50 different students exposed to amateur radio over the years and five have become licensed. Three are now seniors in high school and all are honors students and active in many activities. They all have returned from time to time to help out with the ham club at St Aloysius. Currently there are 10 to 12 regular attendees at ham class. So far this year, the club has fox hunted, operated on 20 meters and learned quite a bit about the rules of radio and how to carry on conversation with a new friend."

"Many of the St Aloysius RC members participate in the Bullitt ARS Field Day effort each year. The kids are some of the key operators in the wee hours and for the last several years the average age for the overnight shift has hovered around 20, when you figure in the old guy with the kids."

Buddy is quite enthusiastic about the Big Project and sees it as a key to the future of Amateur Radio. He says that "Experience teaches us that if you love something and want it to continue, you have to train your replacement. That's what is going on in our schools and clubs with the ARRL's Big Project. It takes local involvement and a willingness to step into the classroom and introduce amateur radio to the youth of our communities. There are many resources to help 'convince' the school administrators of the value of amateur radio. It would be a great coup for Kentucky to have the most classrooms active on the ham bands. We currently have at least three schools going strong and radio will be introduced at Bullitt Central High School this year. Let's see if we can double or triple that over the next few years."

B.A.R.S Activities

The sponsoring cub, the Bullitt Amateur Radio Society (B.A.R.S.) is a diverse organization of amateur radio operators from around the Bullitt and Jefferson county (Louisville) areas. The club is a very active one in our largest city. The club is affiliated with the American Radio Relay League (ARRL) and is active in the Amateur Radio Emergency Service (ARES), the Radio Amateur Civil Emergency Service (RACES) and the American Red Cross. B.A.R.S. is the primary point of contact for the National Weather Service office in Louisville for Skywarn communications.

In addition, the club supports the Greater Louisville Hamfest Committee in its efforts to produce the Louisville Hamfest each year. This hamfest is well-attended, and has a good number of vendors, forums, and other activities.

The club sponsors several Weekly Nets on its repeater on 146.700 MHz (Negative 600 kHz Offset)and 79.7 Hz PL Input & Output. On Sunday at 8:00PM, the Fellowship Net meets; on Monday, at 7 PM, the Mesotrack SKYWARN Net; and on Thursday, 7 PM , the KY School for the Blind Net uses the repeater.

The club maintains a repeater as stated in the nets listing above, with Echolink node, autopatch, and APRS positioning incorporated. The 146.70 Mhz. KY4KY repeater has excellent coverage in the area. In addition there is a 70 cm band repeater which transmits at 443.700 MHz. It has a positive receive offset of 5 MHz at 447.700. No PL tone is used on this repeater.

Regular monthly meetings are at Becknell Hall, also known as the Pioneer Village City Hall, located at 4700 Summitt Drive in Pioneer Village. The club meets the third Friday of each month at 7 PM, except when special events are scheduled, such as the annual picnic and Christmas party. BARS has one of the most comprehensive web sites of any amateur radio club I've seen. It contains everything from club information, to local testing dates, guidelines for use of the club repeater, complete information on getting a license, and many links to different pages of information. It is amazing how much of the site is locally developed, and kudos go to Bob Myers, K4RVM, who maintains the web site. One particularly useful bit is guidelines for using the club repeater, and how to actually set up your VHF/UHF transceiver, and the procedures to use for new hams.

One thing Kentucky lacks, however, is a scholarship for hams. The Bullitt ARS is trying to coordinate an effort to get this changed. The club has tentatively allocated continuing financial support to begin a Kentucky scholarship. Can you step up and help get this going? Contact information for the scholarship is Buddy Sohl <KC4WQ@arrl.net>.

Thanks to Buddy Sohl, KC4WQ, for furnishing the information for this article.

New Coordinations for KY

All were coordinated in the last few months, and at the time of coordination were in the proposed category.

Two Meters:

Madisonville, KC4FIE - 147.6900/147.0900 mhz., tone 82.5 hz. Directory codes - t,e, y.

220 MHz:

Madisonville, KC4FIE - 222.6600/224.2600 Mhz., tone 103.5 hz. Directory codes - t, e.

440 MHz:

Ashland, KZ4G - 448.4500/443.4500 Mhz., tone 88.5 hz. Directory codes - t,s.

Middlesboro, W4HKL - 448.9500/443.9500 Mhz., tone 100.0 hz. Directory codes - t, e, e-sun, s.

Correction to Previous Information

In the last edition, I referred to the Richmond Club as the Central KY Amateur Radio Club. An email from Lloyd Curry, NA4D, corrects this information to the Central Kentucky Amateur Radio Society, since the former is actually in Campbellsville. Just a heads-up, to prevent someone from going to the wrong venue: the Campbellsville Club usually has a swapfest in July, while the Richmond Society has their hamfest in September.

KY QSO Party

Perhaps you will receive the Journal before November 8th, which is the date for the Kentucky QSO Party. *(ed. note: Gee, I'm working as hard as I can to make that happen!)* It goes from 8 Nov 1400z to 9 Nov. 0200z. It is sponsored by the Western KY DX Association based in Bowling Green. Check out the details at <http://www.wkdxa.com/mainsite/>. Be sure to listen for KY4DXA and earn a 500 point bonus for working the club station.

Dixie Heights HS follow-up: Had a good chat with Jim Hicks and his wife at the Louisville Hamfest. His radio tech course at Dixie Heights HS is starting the fall with 30 students. He also has another section lined up for the spring semester with a current enrollment of 29 students.

Thanks to Buddy, and Lloyd for the info here, and as always the KYHAM Listserv and the KY ARRL pages. I'm looking forward to the winter "operating" season. Send any information to me for inclusion in the next issue.

73,
K4AVX

Get The Hammer!

... and let's get technical

Randy McKenzie, KK4EJ

A Big Birthday and Broken Rules

Greetings all! I hope the summer has been great for everyone!

As I write now I have just turned the big 40! I know some of you are laughing at 40, saying, "I remember back then" while others might say," wow he is getting old!" I still see myself as the young guy, still a kid in a lot of ways, and yes still playing with toys!

I recently had an experience that made me have that little kid feeling again: PSK31. I read a little about the mode and decided to research it and see what was there. I'm not a big digital junkie, but I figured I would learn a little bit. So I built up a simple interface, loaded the free Digipan software and starting learning. I watched a few minutes and then tried my first contact. A station responded and then I realized it was Italy! Not bad for a first try huh? That had me excited like a young ham again! The second contact was the Netherlands. Not bad for a few resistors, caps and a transistor (not to mention FREE software!) Needless to say I enjoyed that afternoon on 20 meters.

Another experience happened this weekend. I broke the rules. I broke the BIG rule about HAM ANTENNAS! You know the rule about working on antennas on a nice day? How they won't work, how you must put a antenna up during a 10 degree, ice covering everything, windy terrible, miserable day for it to ever work correctly? Yeah, THAT rule.....Well, I broke it, and paid the price.

I finished the "honey do" list early Saturday and the weather was great, so I decided I would work on some of my

CAT-200 Repeater Controller

This controller was specially developed to provide remote base linking operation and a voice synthesizer at an extremely affordable price.

Features Include:
Voice Synthesizer ID
(12) Voice Messages
CW Identifier
Beacon Message
Remote Base Port
DTMF Audio Muting
DTMF Pad Test
(30) Control Functions
(4) Logic Inputs

THE SERA OFFICIAL REPEATER INDEX

REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2008 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The *codes* column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

SERA RECOMMENDED FM VOICE SIMPLEX

10 Meters:	29.600#						
6 Meters:	52.490	52.525#					
2 Meters:	146.400*	146.415*	146.430*	146.445*	146.460*	146.475*	146.490*

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

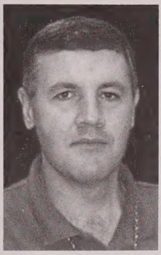
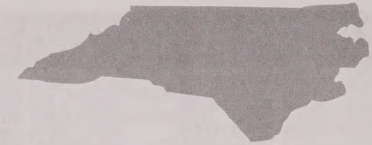
■ ***IMPORTANT NOTE:*** *ONLY OFFICIALLY SERA COORDINATED, ON-AIR, OPERABLE REPEATERS ARE ELIGIBLE FOR SERA FULL MEMBERSHIP An application for SERA Full Membership status, and the payment of the respective dues thereof, does NOT constitute coordinated status for the repeater(s) listed on this application or accompanying sheets. Contact your local coordinator to learn how to obtain coordinated status.*

THANK YOU FOR YOUR GENEROUS FINANCIAL SUPPORT OF THE SOUTHEASTERN REPEATER ASSOCIATION, INC. - YOUR LOCAL COORDINATOR

RJ 09-07





North Carolina

Michael J. Lewis, WA4KE

Robby Hamrick, WA4RH, Shelby Hamfest Chairman noted that "We don't have definite numbers for attendance yet, but feel that our attendance was UP significantly this year as you all came to show support for our efforts to keep the Shelby Hamfest "alive"! We thank you again for attending this year's Hamfest, for showing respect to the park and its staff by not leaving large unwanted items on the park grounds, and by leaving all of your trash in the trash cans. We look forward to seeing you again next year in our "new and improved" location in Dallas, NC." Looks like the Shelby Hamfest has found a new home.

"The Gasette", the official voice of the Guilford County ARS noted that there is a new repeater in the area. The AK4EG repeater, located in Burlington, NC is a "D-Star" (Digital Smart Technologies for Amateur Radio) repeater. The repeater is at 1300 feet above sea level, and the frequencies are 145.320 MHz and 444.8875 MHz.

I didn't have a chance in the last column to mention the winners of the NC QSO Party sponsored by W4NC. Will Roberts, AA4NC/W4MR, took honors in the single operator category, Paul, AA4XX, took QRP honors, Jeff, NY4N, placed first in the mobile group, and the major league throw-down category honor goes to the Orange County club, W4UNC, edged out the team from the Charlotte ARC, W4CQ, by about 100 contacts. The club category is always a great contest that continues to grow each year.

There are many more opportunities coming this fall, and we're always looking for hams to help out. More details and volunteer sign-up information can be found on links from the ham public service calendar at <www.hampublicservice.org>. Questions about public service events may be directed to the RARS Public Service Director at <ai4rt@hotmail.com>. Remember, November 2 City of Oaks Raleigh Marathon, Raleigh, volunteers are still needed.

A tip of the hat to Cliff Fox, KU4GW, from Alexander County. An ardent contester and ARES member, he appeared on WACB 860 AM in Taylorsville, NC on the radio show titled "What Do You Think?" hosted by local radio personality Norris Keever. It is a listener call-in show.

Blue Ridge ARC competed in the annual North American QSO party. The contest ran from 2 pm on Saturday August 16 until 2 am Sunday, and BRARC operated for most of that period, using the ICOM-718 transceiver at the shack and N3FJP logging software. The club entered the multi-operator category using the club call, W4YK, using four operators, each taking a turn at the rig while another did the logging. The club made 177 contacts, and had 78 multipliers of which 5 were on 15m and 21 on 80m.

HI PRO REPEATERS

Hi Pro "R1" Repeater

144 MHz, 222 MHz or 440 MHz

Here is a compact **LOW COST** repeater (less controller) priced at just $899. A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,379. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

Hi Pro "E" Repeater

144 MHz, 222 MHz or 440 MHz

The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

EV1 VHF Transmitter

RV4 VHF Receiver

The workhorse bands were 20m and 40m, each of which afforded the club with 26 multipliers for a claimed score of 13,806 points.

North Carolina has a very unique location between Southport and Fort Fisher, a very small sliver of the grid FM13. The Carolina DX Association operated in FM13 during the July CQWW VHF Contest. ARRL's recent announcement of a new award called the Fred Fish Memorial Award (FFMA), for working all 488 grid squares in the USA on Six Meters, and suddenly rare grids were a hot topic for VHF enthusiasts. In addition, a recent survey showing the USA's rarest grids, proved what many of us knew, Fox Mike 13 was the rarest grid on the East Coast. It is located on the coast, but is 99.4% water, with only a small footprint of terra firma that includes parts of Southport, Kure Beach, and Fort Fisher. The Carolina DX Association conducted a DX expedition from FM13. The core group was assembled:
Bill, W4GRW;
Ken, K4DXA;
Pat, N4BH;
Nyles, KS4S;
Joe, KI4TZ; Ric, AA4SC; Ron, AA4S;
Bill, W4WNT, and
Dave, W4JL.

Outer Banks Repeater Association has agreed to provide communications for Max Radio (Beach 104 and Water Country 94.5) for the OBX Marathon on Nov 11 (starts at 7 am in Kitty Hawk). The group needs need ham operators who are willing to be stationed along the course to communicate with KG7SB (net control). The 146.94 antenna is located on Max Radio's tower just across the sound and 5 miles up Rt. 158 in Mame. Please contact KG7SB if you can help. Also, the OBRA sponsors a VIP (Visually Impaired Persons) Fishing Tournament on Oct 9.

The 20th Annual JARS-FEST Hamfest will be held Sunday November 16, 2008 between the hours of 8 AM TO 4 PM. The talk-in is on 147.270. Two benefits this year – good cooking still presides over the Jarsfest and the election will be over.

Go to the following webpage to check on your club's ARRL club status. <www.ncarrl.org/clubs/index.html> If your club is ARRL sanctioned, then you should be listed. Also, have your club's responsible person to update the ARRL database. If I can't contact you, neither can a person who is interested in ham radio.

In closing I would like to thank the editors of the newsletters that provide the club news which I plagiarize each quarter. Please continue to send the emails and newsletters for your club. As space permits, we try to publicize the clubs' events as much as possible.

Thanks

– WA4KE@sera.org

We needed an instant program for out local club meeting. ARVN's *Digital Voice for Amateur Radio* saved the day. The video was well received and the comment was made about packing "that much information into such a short time frame."

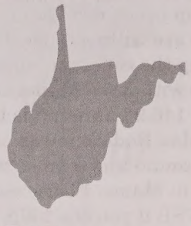
West Virginia



Morris G Kittle, AD8T

As this column is written, the leaves are turning but have not yet fallen. The temperature is starting to go into the 30's at night. It is the beginning of "radio season" for many operators who are otherwise occupied during the warm months. Not coincidentally, the static is diminishing on the low bands, although propagation itself is not necessarily getting better. 10m & 6m band openings will often be few and far between until Cycle 24 kicks in. VHF & UHF contesters find conditions on the mountain tops a lot less hospitable than summer! There seems to be something very satisfying about looking out the window and seeing the snow howling, and being able to sit in a warm shack (but not as warm as it once was with tubes), and talk to others in distant places.

Repeaters, thankfully, continue to function the same all year around. Other than summer band openings, the local nature of repeaters renders them generally immune to the seasons. The only natural variables I can think of which affect their operation at all are antenna icing, wind, and lightning, the latter two of which can happen any time of year. Extended power outages are not very common, and normally not a big problem. The backup batteries or generator usually can deal rather seamlessly with power interruptions. Let's consider interference to repeaters as "unnatural" phenomena. That is a couple Journal's worth in itself...what's your [dis]pleasure...intermod, intentional interference, kerchunking, interference from other repeaters, pagers, commercial radios, government repeaters... if I've missed anything obvious, I hope you'll let me know.

Yes, and there's vandalism—the painful and frustrating curse that usually strikes repeaters in the good weather, when the criminal element seems to be drawn to the highest points, as if escaping an invisible flood. Truth is, they are everywhere among us, but unfortunately repeaters are usually in isolated spots. I once saw clear evidence that vandals had carried big rocks up a fire tower and managed to heave a couple of them out far enough that they landed on the repeater building. Now, that is creative criminality if I ever saw it. That puts common door bashing, cutting cables and such to shame. If you have some stories that can top that, I would like to hear from you. Send me your vandalism stories. Since misery loves company, perhaps the experiences of others will provide a little comfort...very little!

Like most of us, I use several repeaters but support one. I would like to publicly thank the owners/trustees/technicians of every repeater I have ever used in the last 32 years. I have helped with actual repeater work and maintenance just a little. The amount is totally insignificant compared to the time that many of you have spent over the years—the hours upon days upon months upon years--- buying, installing, upgrading, repairing, programming, troubleshooting, and DRIVING. I have been involved in repeaters at least enough to have a great appreciation of what you do. It has to be a labor of love. Again, I thank you.

The club that I belong to had a fox hunt recently. We used the typical plan, with a control point plotting readings taken by mobile units. We did not find the 3W fox in an afternoon. However, we narrowed his location from over 300 square miles to less than 1 square mile. The fox did not reveal his location, so we plan to continue where we left off, and I believe we will prevail in a short time. The bugaboo, as always, is signal bounce—off buildings and mountains. This can cause wild errors in directional readings. I would really like to see what a fox hunt would be like out on the Great Plains, far from any town or grain silo. I wonder if it would be easier. Even with errors, the main map plot will usually reveal closely the fox's location IF there are enough readings. The cost of fuel would seem to be somewhat of a deterrent to this activity, but we look at it as money spent on any other entertainment. The cost of fuel is the only cost once you have the gear, most of which can be used for normal ham use.

Like satellite, contesting, EME, digital, traffic, paper chasing, and others, DFing as it is also called, is just one of many aspects of the hobby that certain people enjoy. Our fox transmitter is built into a steel tackle box with yellow stripes painted on it. We use a 5/8 wave whip with a little red flag. We figure if you get that close, you deserve to see the flag. Our practice is that the fox is hidden in a location that is publicly accessible. It wouldn't be fair for the fox to be in a spot that someone would be afraid to go into.

One issue that hasn't escaped our consideration is that, in today's world, the fox must be attended by a ham close by; it would not be prudent to have a menacing-looking metal box with an antenna sticking up sitting out unattended for the public to find. This is unfortunate but true. We don't wish the fire department, federal authorities, and police to find our harmless fox box due to someone seeing it and calling 911. Discretion and all that.

I very much enjoyed the WV State Convention at Jackson's Mill. I bought the usual rubber feet, plus some other things that I needed even less. There were good forums and fellowship. I immensely enjoyed having an eyeball with some of you whom I hadn't seen in a long time.

Once again, I am calling for input from WV amateurs. Send me pics or stories of your repeater/contest station/antenna farm/harmonic hams in the family/construction project. Tell me about your digital setup. Have you or your group done something worthwhile with emcomm that you want to share with the rest of us? Have an interesting SET scenario? Something funny happen to your group at Field Day? Worked some good DX on 6 this summer? Talk to me…please.

Admittedly, I'm prejudiced; but I thought the last column on repeater stats was at least mildly interesting. I received not one word either way from a single soul, save one good friend. Friends, I can write all day…for years, even. But that is not the mission; rather, the title is "WV Correspondent"; that implies a dialog between us; a give and take, a conversation…back and forth! I would much rather relate some material that originates with YOU rather than write essays. It is a privilege to write this column and I hope to continue for some time, but I need to hear from you with YOUR material and insights. I hope that you have a Merry Christmas, and that 2009 starts out well for you and yours. God willing, I'll see you next year. 73, Mo

25th Annual
Charleston Area
Hamfest
Saturday, March 21, 2009
9 a.m. to 2 p.m.
COONSKIN ARMORY
1707 Coonskin Drive • Charleston, WV

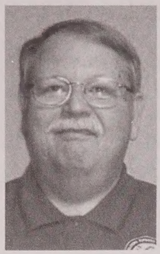
TALK IN: Call W8CHF on 145.35 Repeater

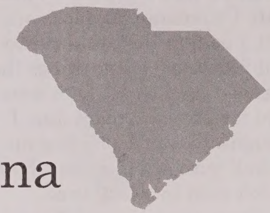
ADMISSION: $5

VE TESTING: 12:30 p.m.

ARRL and ARES Forums
DXCC, WAS, VUCC Card Checkers

DIRECTIONS: Take Exit 99/Greenbrier St., off I-64/77, towards airport. Veer right past airport turnoff. Go to stoplight at Go-Mart and turn left onto Coonskin Drive. Armory is about 3/4 mile on left, just before entrance to Coonskin Park.





South Carolina

Roger Gregory, W4RWG

Hello South Carolina,

I am sad to announce that James Albert "Jim" Hord, N4UJH, passed away on Saturday, May 3, 2008. Rev. Hord received a BA from Asbury College and a Masters of Divinity from Asbury Theological Seminary. "Jim" was a retired pastor and missionary, he served the United Methodist Church as a minister for 10 years, and for the next 31 years he was a missionary for World Gospel Missions, serving in Honduras, Central America. This is when he became involved with amateur radio. Following retirement, his family settled in Union where he was a member of Duncan Acres United Methodist Church and an active member of the Union County Amateur Radio Club.

Jim always monitored the Union repeater, especially in the last few years when his health began to fail. He was not able to rest very well and was there day or night. He loved to talk and frequently "timed out" the repeater, but that was all right. It seems not enough to say that Jim was a good man, he was "Saint" and I miss him a lot. I bet Jim, Bill, Marshall, Jay and David are having a big round table right now. Jim is survived by his wife Barbara "Bobbie" of Union, SC and 2 daughters; Amy H. Leonhardt and husband Mike of North Augusta, SC and Lisa H. Layton and husband Jamie of Southbury CT.

The **Anderson Radio Club** announces that Field Day was a success. They had a GOTA station, solar power, and operated 2A. Dr. Jim, N2ZZ, stopped by along with Charlie, AE4UX, who is the SC Emergency Coordinator. The club announces the death of Joe Brown, K4CLQ; a long-time member of the ARC.

The **Florence Amateur Radio Club** recognizes members of the month. Scott Thompson, KI4HIE, and Jim King, KI4MVA. Congratulations to you both. There are 12 new hams thanks to the SC HEART. The instructor was Dave Zugsberger, KL7FO, of Abbeville. Who says ham radio is dying...

The **Greenwood Amateur Radio Society** has two nets, every Thursday at 9 pm on the 147.165 repeater and a female net on Tuesday at 9 pm on the 147.165 repeater. The date for the Greenwood Hamfest will be January 10, 2009. The address is 1610 Highway 72/221, Greenwood Civic Center. Talk-in is 147.165

The **Pickens County Emergency Communications Group** has installed echolink on the 442.400 repeater. The PCECG participated in Field Day on June 28-29. A special guest was their SC Representative David Hiott. Meetings are held the first Tuesday of each month at 7 pm in the EOC located at 1509 Wahalla Highway West of Pickens.

The **Salkahatchie Amateur Radio Society** appointed a committee for new officers for 2009 and voted to continue the fox hunt every other month. It has been decided that the Christmas Party will be held at Vince's sometime in December.

Attention SC Repeater Owners. I ask that you consider joining SERA as a full member. See the application in this issue and join today. With your full membership, two subscriptions to the journal will be mailed to your designees for as long as you are a full member.

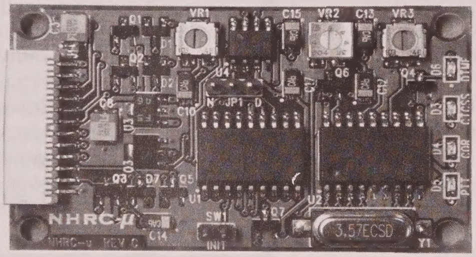
It seems that everyone that was sending me news has stopped for one reason or another. South Carolina at one time took up two pages of the journal. I would like to see that return.

If your club news is not in the journal, tell your club secretary to send me your news.

73,
Roger W. Gregory
SERA President
SC Director

NHRC
REPEATER CONTROLLERS
NHRC-μ (Micro)

Ultra-Compact
Repeater Controller/IDer



(actual size 1.25" x 2.00")

NHRC-μ Features

- Repeater Controller, IDer, or Beacon modes
- High and low-going COR and CTCSS inputs
- Extremely compact
- "Intelligent" ID algorithm
- Programmable CW ID speed and pitch
- 21 Control operator settings
- 4 User commands
- 5 Saved setups
- Touch-Tone remote control and programming
- Windows™ based, serial port programming
- Hang timer, ID timer, Timeout timer, and CW messages stored in non-volatile memory
- Jumper-selectable receiver deemphasis
- LED CAS, CTCSS, PTT, and DTMF indicators
- Extremely low power consumption

The NHRC-μ ("Micro") is a compact repeater controller/IDer designed for easy installation in close quarters. The NHRC-μ can function as a conventional repeater controller, as an IDer for repeaters, or as a beacon controller. It can be easily mounted with double-sided foam adhesive tape, and connected to the equipment with flying leads, allowing for easy installation in almost any equipment.

The NHRC-μ is programmable by sending DTMF sequences over the air, or by computer with a serial port connection and the free NHRC-μ programming software. The CW ID, hang time, ID timer, timeout timer and courtesy tone beeps can all be programmed by the user. All programming is stored in non-volatile EEPROM memory.

The NHRC-μ (Micro)

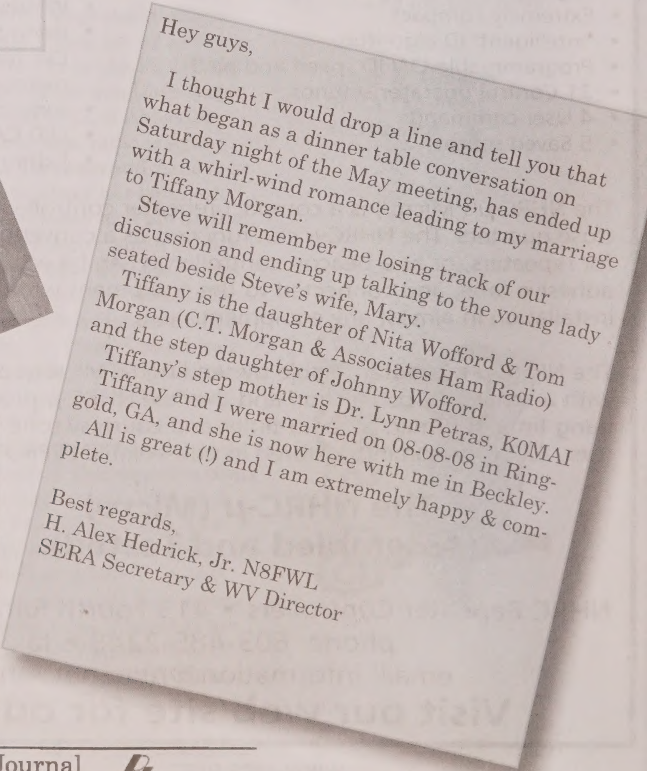
January, 2009 SERA Meeting

The January, 2009 meeting of the SouthEastern Repeater Association will be held on January 9-10 at the Baymont Hotel in Kodak, TN. The meeting usually starts at 1:00 PM Saturday and concludes with a brief session on Sunday morning.

Special rates are available for those attending and wish to stay overnight (the SERA Treasurer wishes to stress that individual interested parties should pay for their own accomodations.) PLEASE let the SERA officers know if you plan to attend so that there will be enough room for you to sit.

Any questions or pre-meeting comments should be directed first to your state director. See the front of this newsletter for their contact information.



Hey guys,

I thought I would drop a line and tell you that what began as a dinner table conversation on Saturday night of the May meeting, has ended up with a whirl-wind romance leading to my marriage to Tiffany Morgan.

Steve will remember me losing track of our discussion and ending up talking to the young lady seated beside Steve's wife, Mary.

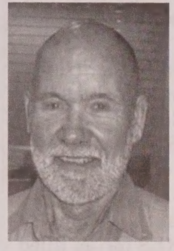
Tiffany is the daughter of Nita Wofford & Tom Morgan (C.T. Morgan & Associates Ham Radio) and the step daughter of Johnny Wofford.

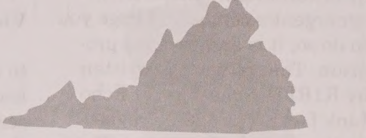
Tiffany's step mother is Dr. Lynn Petras, K0MAI

Tiffany and I were married on 08-08-08 in Ringgold, GA, and she is now here with me in Beckley.

All is great (!) and I am extremely happy & complete.

Best regards,
H. Alex Hedrick, Jr. N8FWL
SERA Secretary & WV Director





Virginia

Fred Weaver, KG4BKI

A Banner Story

I attended the HamFest 2008 in Vinton, VA in August. This is a nice 'fest in the cafeteria of the local high school. The event supports the Roanoke Valley ARC. The attendance looked a bit lighter than last time I attended, but a good event with a nice area for outside tables. However, about the banner…

Most readers have seen the yellow SERA banner at hamfests and pictured here in the RJ; we have one banner in Virginia. As the coordinators and correspondent travel around to different events the banner is transported by one of the SERA volunteers, or mailed. Our banner sees 4 or 5 events each year. From Vinton, the next event is the Virginia Beach Hamfest. I was the transport guy.

Oops! As I was getting my things together to leave the Vinton event, everything is stacked on my little hand truck and I walk off – leaving the banner in its shipping tube, on the table! About two hours later; I realize the banner is still in Vinton. Some frantic phone calls take place as I'm estimating the cost of a new banner. I reach Phil Roark, K4WFO, and tell him my tale of woe.

Phil calls the school, but no banner is in sight. On Sunday, Phil drives from Salem back to Vinton and takes a dumpster dive to retrieve the SERA banner! So, Phil, thanks for going way beyond anything I could have expected. It is very much appreciated.

Hanna Blows In

The first hurricane to impact Virginia, Hanna; turned out to be pretty tame. However, Hanna provided the opportunity to test ARES/RACES call-up procedures and communications planning. Terry Hebert, State Amateur Radio Liaison provides the following summary in his After Action Report:

"The Virginia Emergency Operations Center (VEOC) went to Hurricane Condition Readiness I on 5 September at 1000 hours and augmented the VEOC staff with Virginia Emergency Response Team members in anticipation of Tropical Storm Hanna impacting the Commonwealth in the morning hours of 6 September. The VEOC Amateur Radio RACES Station was activated on 6 September at 0700 hours. A callout was made to VEOC ARCA members to schedule 2, 12 hours shifts, beginning at 0700 hours for a minimum of 48 hours. The Virginia Amateur Radio Emergency Service (VA ARES) was notified of this activation and to be ready to respond to their respective local EOC's and assigned areas if needed. Because the intensity of the storm was less than anticipated and the need for backup communications diminished, the second shift was not activated. The VEOC RACES Operation demobilized at 1500 hours, 6 September."

The following jurisdictions activated RACES in local EOCs: Chesapeake, Virginia Beach, Portsmouth, James City Co., Caroline Co., Middlesex Co., Prince William Co., Gloucester Co., Loudoun Co., Dickerson Co., Augusta Co., Lancaster Co., Newport News, Roanoke Co., Rockingham Co., Harrisonburg Co., and Isle of Wight Co.

During ths period the Old Dominion Emergency Net (ODEN) was active on 3.947 MHz for 7.5 hours. They had 75 stations check in from 41 separate jurisdictions.

NWS Wakefield

The Amateur Skywarn station at NWS Wakefield, WX4AKQ, was activated during Hurricane Hanna. This was the first test of the station improvements that have been made at Wakefield. Jon Benignes, K4KLB, was the operator. More info on Skywarn activities at NWS Wakefield is at <www.wx4akq.org>.

APCO P25

The September issue of QST (Vol. 92, No. 9, p. 36-38) had an article on the digital mode APCO Project 25 (P25). P25 is a set of standards developed by the Association of Public Safety Communications Officials International (APCO). It is a digital protocol that has voice and data on either trunked or conventional systems. The system is getting some attention by hams as repeaters and radios with P25 capability start to fall into Amateur's hands.

I was particularly interested in the article as the 2m repeater in Franklin (147.27 PL131.8) is specified as "P25 capable". It is a MastrIII repeater which is still referred to generically as a "GE".

So, I am happy to pass along the information that Mark Cobbeldick, KB4CVN, has converted a pair of MastrIII's for a P25 cross-band operation. The repeaters are located on Chandler's Mountain near Lynchburg. The 2m side is 146.610-(136.5); 70cm is 420.050 in, 426.050 out (136.5). The NAC (Network Access Code) is 293. Mark has agreed to share his Power Point presentation with anyone interested in P25. He is at <kbcvn@yahoo.com>.

There is a good web site with several informative links at <www.p25ham.com>.

South Boston Repeaters

Charles Lowery, NW4V, sent this report on the relocation of the 145.35- and 444.625+ repeaters from Halifax County HS to a tower (220') near the Berry Hill Plantation. I was interested in his description of the controller. Here's his report:

One of the most interesting components is the control system. If you have never looked at EchoStation, <http://www.synergenics.com/sc/>, I urge you to do so, it is an awesome program. The software is written by K1RFD, Jonathan, of Echo Link fame. For $20.00 registration it is the best controller you can buy. It will run on just about any old computer that has a minimum of memory, speed, and hard drive. The software allows simple connections between the TX with only PTT and TX audio from the sound card. The RX interface only needs RX audio to the sound card and will work in VOX mode. We did decide to run the COS line to the computer through the Com port used for the PTT signal. The computer runs Hamachi tunneling software and VNC allows me to control any function from home or work. On Fridays, I down load the ARRL and AR new programs for scheduled airing. The software will allow you to set the announcements any time and as often as you need. This is great for meetings and other events.

Virginia Beach Hamfest

I enjoyed my annual trip to the Virginia Beach Hamfest. Some hams I talked to seemed a little disappointed in the turnout. Some others, who seemed to be characterized by having made an exciting purchase, thought the event was great. The ARES forum filled the room. This was a combined meeting with Roanoke Division Director, Dennis Bodson; and SM Carl Clements, W4CAC. Dennis indicated that ARRL is looking into some of the outdated "data" regulations and the rates allowed for digital communications on various bands. Also, that an actual "band" at 5MHz is still in the works.

One thing is very clear to your correspondent – if you want to see hamfests in your future – go and buy something. Otherwise??

Another year is about to conclude and I would like to thank everyone who has offered items for me to post here for other repeater owners to read. Keep the news coming as well as any photos of events you may have participated in or attended. If you would like to see anything in particular posted in this column on an ongoing basis please get with me and we'll arrange to make it happen. Happy Holidays to everyone! Let's get 2009 rolling with a bang, get me those news stories and pictures of your holiday parties!

Club News

Congratulations to the following folks who were elected to take the reigns of the Atlanta ARC for the coming year: President-Bill Perkins, KB4KFT; VP-Rob Osattin, KI4UTY; Treasurer- Bert Bruner, KI-4FOV; Secretary-George Lane, KI4DSO; and Member-at-Large-Chris Fowler, KI4YMD.

The Atlanta Radio Club is looking forward to hosting the 2008 AMSAT Space Symposium. The event will be held at the Atlanta Buckhead Doubletree Hotel on Friday, October 24 through Sunday, October 26, 2008. Many clubs throughout the Atlanta Area are providing volunteers. The AMSAT Board of Directors announced that the 2008 AMSAT Space Symposium will be named the "2008 Harry Yoneda, JA1ANG, AMSAT Space Symposium" in memory and honor of JA1ANG -- Silent Key. Harry was a former AMSAT Board Member and close friend of many in the group. Harry also was a founding member of JAMSAT. This year, we have selected a hotel in the heart of Atlanta. With easy access to world class shopping, downtown, Centennial Olympic Park, CNN center, the World of Coke, and the Georgia Aquarium, symposium attendees should have plenty of activities for everyone. Bring along the whole family! For more info: <www.amsat.org/amsat-new/symposium/2008>.

The Atlanta Radio Club would also like to remind everybody about the monthly Sunday Tech Session which will be on 12 October 2008 (the second Sunday of the month). This month's session will be at Dekalb Peachtree Airport (PDK) and will be a hands-on session with APRS lead by George, KI4DSO. The goal is to experiment with APRS, what it is, what it does, how to set it up, message passing, and GPS interfaces. As usual there will be a short discussion followed by hands-on. There will at least two APRS working stations at the session, at least two outside antennas for talking to digipeaters, and enough power to run several radios. Folks are encouraged to bring their own radios, computers and GPS units if they want to try things with their own radios. Showing off is OK, so if you are an experienced APRS person feel free to come and share your knowledge. So pack up your stuff and come on over! PDK Airport at the main administration building (EPPS) room 227, 3 pm. The Sunday Tech Session is held the second Sunday of every month.

The Southeastern DX Club is celebrating their 50th Anniversary this year! To help celebrate the SEDXC, the club has a new club QSL card and recently sponsored an international operating contest with significant awards that were be earned by both SEDXC club members and the rest of the world. Join me in congratulating the Southeastern DX Club for 50 years of Amateur Radio service! For more information see: <http://www.sedxc.org/>.

Do you live on the west side of Atlanta? Do you know where Roopville, Bremen, Buchannan, Bowden, or Tallapoosa are located and know the hams who live out here? The Douglas County GA Amateur Radio group is designed to promote and support Amateur Radio Services (Ham Radio) in Douglas County and Western Georgia, especially operators in Douglas, Carroll, Haralson, Paulding, and any area of West Georgia not covered by existing groups. Heck, we even support eastern Alabama - Ranbourne, Woodland, Fort Payne - so come by and help spread the word! We know where you are... For more info: Larry, N4LEC <http://groups.yahoo.com/group/dcgarc>.

The Paulding ARC recently held another great hamfest. This year's fest was blessed by perfect weather and a less-than-perfect surprise. When club president Andy Peltier, KI4HVN, arrived at Paulding Meadows Park in the wee hours of the morning, much to his surprise, he wasn't the first to arrive. The park was already overrun, and not with early bird hams, as he dared hope for one brief shining moment, but with Scouts, lots and lots of Scouts. Four hundred fifty Scouts and leaders had set up camp in the park. It was the weekend for Webelo Woods. Scouts everywhere. Tents everywhere. The hamfest being a free tailgating event provided the chance to connect Ham Radio and Scouting. It was mentioned that a mini merit badge class broke out and future merit badge classes and JOTA plans were discussed.

The Ellijay ARC also recently hosted their annual hamfest. Dubbed the"biggest little Hamfest in Georgia", sevearl hundred folks attended for good deals, great food, and great prizes. This event is held every August in Ellijay. What a way to spend a few hours in the north Georgia mountains!

The North Fulton ARL recently hosted a "HamCram" where folks could come and study for their license exams in a day. Mack, WB4MAK, was pleased to announce that 18 new Ham Radio operators were added to the ranks of Atlanta Amateur Radio operators. A special thanks to all the NFARL and ARC members who helped at HamCram. The program was supported by 12 members.

The Thomasville ARC recently started a class for prospective Hams. 30 people have signed up so far and we've had 10 of those come in for the initial 3 sessions. Four even showed up in the midst of TS Fay. Most of these new hams are people you already know, but several you may not. So here from a teacher's perspective are the latest "on-air" additions to our Radio Family. Seven attending decided to take the test with six passing; Stewart Chandler, KJ4GO; Colby Swicord, KJ4GOK; Amy Swicord, KJ4GOL; Mike Drawdy, KJ4GOM; Carolyn Peeples, KJ4GON; Mike Wittenborn, KJ-4GOO; Dana Swicord, KJ4GWB, and Nell Brown, KJ4GWC. The goal is to have all 31 pass the test. Of those signed up for the class, 10 are FEMA members and 7 are fire fighters.

The Rebirth of a Repeater

William Perez, NM4W, reported recently on the birth of a bouncing new repeater in the Cochran area. Sponsored by the Central GA ARC, this new NM4W repeater, on 145.11 MHz, is now happily cradled high above the treetops on the city's water tower. From its conception, this was a project that was clearly meant to be. SERA did a terrific (and speedy!) job of re-coordinating the repeater pair for them, and not only did the sheriff's department help ease the way for the usage of the tower, but it also provided the antenna, hardline, and a shelter on the cat walk at the water tower. And in addition to the sheriff, they also had the EMAs and MAYOR pulling for them. All they needed was a working repeater. What to do? What to do? Using spare parts from another repeater that had met its untimely demise by lightning strike, Mike Besemer, WM4B, and Dan Haines, KF8DB, built one. Anyway, the repeater went on the air on July 22, and is reported to have great coverage for Bleckley, Houston, Dodge, Pulaski, Laurens, and other surrounding counties. Dr. Wil provided a website, where you can find some pictures of the successful installation <http://goodtimes.webshots.com/album/563939728VAeOdU>. He ended by adding, "All of this wor k was done with the help of very dedicated Amateur Radio Operators, the Central Georgia Amateur Radio Club, and the City and County Government of Cochran and Bleckley County. A BIG thanks to all of them!" So Congratulations, guys! (Who's handing out the cigars?) Thanks to Susan Swiderski, AF4FO, ARRL GA Section Manager for helping on the info.

ARES News

South Fulton ARES has a new ARES group and a new Emergency Coordinator (EC) - Ryan Ingoglia has been appointed EC for South Fulton County and has reconstituted the South Fulton ARES group. If you're not aware, Amateur Radio Emergency Services (ARES) groups provide a valuable and much-needed service for incidents such as natural disasters, public events (such as parades, sporting events, and marathons), homeland security preparedness and training, and other public service programs. Ryan and SFARES needs volunteers - whether it's a few hours a month or a few days a week, any time you can spare would be helpful. To participate, contact Ryan, K5NRP or check out the SFARES web site at <http://www.sfultonares.org>.

Have you ever thought about working a disaster but have been a little apprehensive? Check out what one non-ARES Ham discovered recently: (Notes from Rob Osattin, KI4UTY, during Gustav working communications at the Atlanta Red Cross HQ)

"I'm about to leave to go back to the Red Cross for my 6 hour second shift as Alternate Net Control for the Red Cross Emergency Net. I must admit that I was pretty apprehensive before going there the first time because I had no ARES experience and had no idea what to expect. But the welcoming environment of the ARES people and the Red Cross quickly quelled by fears. We are providing communications between Red Cross HQ in Atlanta with the 3 shelters and 2 welcome centers that are housing refugees from New Orleans and everyone was pulling together to make the whole process work.

Our room at the Red Cross has a sign on it that says "Ham Radio Partners" and the Red Cross means that. They look to us as their eyes and ears to and from the shelters and we all are doing our best to keep the information flowing. Because our room has the only TV,outside of the command center, people were also coming over to get current Gustav status. And one shelter, which also was lacking a TV, also called us from time to time to find our what was happening so they could keep their 250+ clients informed.

I recommend participating next time the opportunity arises. Using radio skills for public service is truly a gratifying experience. Listen to us on the ARC (146.280) repeater if you get the chance. Traffic moves infrequently but what there is of it is usually interesting to hear. 73, Rob Osattin, KI4UTY."

Keep sending those emails to <n3ack@sera.org>. You never know, you might find yours or your club event picture on the front cover someday!

My Word!!!

Tom Gallagher, N4IOZ
Repeater Journal Editor

Hello, folks. I don't often take the opportunity to write, simply because there are others who do it so much better than me; however, there's a few thoughts that I'd like to express, Ham-to-Ham.

Last Chance to Save a Buck

At the June, 2008 Board meeting it was called to our attention that SERA had a negative cash flow for the first few months of this year. Now, we are not in financial trouble by any stretch of the imagination, but we don't want to wait until we're broke before we try to fix the problem. To make a long story short, we have to raise dues.

You already know the problems we have: postage has gone up by more than 30% for us, paper costs have gone up, ink costs more, and other expenses are up, too. If it were not for the support of our advertisers, SERA dues would have had to go up more than a year ago.

As I wrote above, we aren't in big trouble.... yet. However, we have to pull in more money to keep going. As editor, I addressed the question of raising ad rates by pointing out that our membership has stayed at the same level for the past few years. Advertising is generally sold on a "cost-per-thousand" basis, and unless we have more eyeballs looking at our magazine, we can't morally boost our rates higher than they are right now. The good news is that our members are active hams who generally are "ready to buy" when they look at our ads. So, advertising in The SERA Repeater Journal remains--- in the words of one of our advertisers--- "one of the best ad values around." So, to stay out of trouble at the bank, we're going to have to ask you for more money. We hate to do this, and we hope that it'll be many years before we have to do it again.

There is a bright side to this: if you act now, you can help out SERA and keep a few bucks in your wallet at the same time. We try our best to be good stewards of your money, which is why we were able to put the dues increase off for a few months. In the meanwhile, if you renew for one or two years, you can renew at the old rate. One catch is that you have to send in your renewal before January 1, 2009. I'll be honest, what we'll do is take your dues and Johnny will put it in a high-interest account at the bank so we can make money until we need to spend it. The other catch is that you can only renew for two years--- no more than that.

So, do both yourself and SERA a favor: pull out that checkbook and renew for two years--- you'll put money in the bank for SERA, and you'll keep getting the Repeater Journal at 2008 prices!

Nominating Committee Report

To: Alex Hedrick N8FWL, SERA Secretary
From: Don Williams W4VT, Nominating Committee Chairman
The nominating committee reports the following nominations for the upcoming election.

Georgia:
Director: J. Allen "Pete" Seabolt, N4KHQ
Vice Director: Phil Heaton, N4BBQ

Kentucky:
Director: Mike McCown, K4ITF
Vice Director: vacant

Mississippi:
Director: Steve Grantham, AA5SG
Vice Director: Aubrey Bilbo, KE5LT

North Carolina:
Director: Danny Hampton, K4ITL
Vice Director: Frank A. Lynch, W4FAL

South Carolina:
Director: Roger W. Gregory, W4RWG
Vice Director: Jim Cantrell, WJ4C

Tennessee:
Director: Alan McClain, KA4BNI
Vice Director: vacant

Virginia:
Director: Jim Campbell, K4YM
Vice Director: Jay Campbell, N4YMY

West Virginia:
Director: H. Alex Hedrick, Jr., N8FWL
Vice Director: Richard Dillon, K8VE

Sincerely,
Don Williams W4VT
Virginia Assistant Director
Nominating Committee Chairman

SERA NOMINATION FORM

For the Office of SERA State Director or Vice-Director

This completed form must be mailed to the Secretary - postmarked no later than NOON, Nov. 28, 2008.
Note: the Secretary must also be notified verbally by phone no later than NOON Nov. 28, 2008.

To the SERA Secretary:
The below named person is nominated to the Office listed. The nominee has been contacted, has agreed to serve, and an acceptance letter is enclosed. The nominee (1) is a SERA FULL MEMBER, appropriately listed as such in the February 2008 Repeater Journal, (2) is not an officer in any other coordination council (3) and fully qualifies under the bylaws of SERA to hold office. It is understood that this nomination from the floor, signed by myself and THREE other eligible SERA Full Members, will be added to the nominating committee's list of nominees. This "from the floor" nomination will cause an election to be held by written ballot, mailed to every Full Member in the SERA District the nomination effects .

NOMINEE INFORMATION: (Use separate sheet for EACH Nomination - Director or Vice Director)

Nominated for the SERA State office of ______________________ for (State) __________

Name ______________________________ Callsign ______________

Address ______________________________ Phone ( ) ______________

City ______________________ State __________ Zip ______________

Is a representative of the ______________________ Full Member Repeater System

Person has been contacted and has agreed to serve: [ ] Yes. Acceptance letter enclosed? [ ] Yes

Please include a brief biographical sketch of nominee on separate sheet of paper. Enclosed? [ ] Yes

This SERA Nomination is certified by:

Name (print) ______________________ Callsign ______________ State __________

Phone [ ] ______________ Signature ______________________

I am a member of ______________________ SERA Full Member Repeater Group.

Do not write in this box

Please list three other Full Member Repeater Representatives (each must sign this sheet)

(1) Signature ______________________________ Callsign ______________

(2) Signature ______________________________ Callsign ______________

(3) Signature ______________________________ Callsign ______________

Mail this fully completed form with other necessary paperwork to: ALEX HEDRICK N8FWL, SERA Secretary, 1021 Woodlawn Ave, Beckley, WV 25801. This mailing must be postmarked no later than NOON November 28, 2008 AND Verbal Notification by Phone (888) HAM-SERA (426-7372) to the Secretary is required by NOON Nov. 28, 2008.

IMPORTANT: All eligibility conditions for nominee as per SERA Bylaws, and all requirements of this nomination form must be met for a legitimate nomination from the floor. Otherwise, the nomination must be disqualified as non-valid for the forthcoming Director/Vice-Director election.

Notice of "Spotlight" business display ad policy

To better serve both our membership and business card sponsors, effective with the February, 2009 issue of *The SERA Repeater Journal* there will be a change in the policy regarding placement of these announcements.

The purpose of the "Spotlight" business card placement is to acknowledge people or businesses who wish to support SERA, but who don't necessarily have a product, event, or service relating to Amateur Radio that they need to advertise. We appreciate their support, and hope that when you have a need for their type of business that you'll think of them first.

However, these are not traditional "ads" in the usual sense. They are always prepaid, and run for a set period. Beginning with the February, 2009 issue, these ads will run for the calendar year. This will help us keep track of card expiration, as the same composite "Spotlight" page will run in all four issues.

We thank those that appear above, and we hope that others choose to appear with them through the year 2009. If you wish to have your business card appear on this page, simply send it along with a check for $30 to: Repeater Journal Editor, 410 East Sprague St, Winston-Salem, NC 27127-3108.

Thanks again for your support!

Attention Hamfest Sponsors

There are two announcements for you this issue. The first is a repeat of our announcement in August:

In February, 2009, we'd like to have a list of all the hamfests in our eight states, plus any in adjoining states that would like to let us know about themselves.

If you've e-mailed us at <hamfest@sera.org> this year, or if you do so before the end of November, we'll send you a form to fill out to give us all the information we'd like to list in a special, expanded listing of 2009 hamfests. For those of you without e-mail, please send an SASE to "Hamfest Editor" at the Winston-Salem address on page 3 of this issue, and we'll gladly send a paper copy to you.

The second matter concerns paid ad placement in the *Repeater Journal* for hamfests. In short, please refer to the policy, as stated in our rate card to the right, concerning payment for hamfest ads, as we must return to the strict enforcement of this policy. While we are well aware that many hamfests run on tight production budgets and cash flow can be a problem, as volunteer stewards of the SERA publications we need to keep close account of our resources.

Thank you for your attention, and your continued work to promote amateur radio events in your area.

Invoicing & Ad Insertion Orders

DEALERS: Quarterly dealer invoices, after insertion, will request information pertaining to future insertions. If no instructions on the *paid* returned invoice copy are received, the ad will be *repeated* and invoiced the upcoming quarter.

HAMFEST: Advertising must be ordered each edition for insertion. Payment must accompany insertion order/advertising copy for Hamfest ads except for continuing insertions. Please contact The Editors for a Hamfest Ad Order Form and other information.

Advertising Payment Policy

ADVERTISING INVOICES are due upon receipt. Unpaid invoices will require us to withhold publication of any additional ads until account is paid in full. First time advertisers, occasional hamfest advertising and Spotlight Page advertising is to be paid in advance - please submit check with order.

Specifications & General Information

ADVERTISING SIZES are listed above. Ads that do not fit dimensions will be adjusted at no chage. Digital copy is preferred, hard copy is acceptable. Contact the editor for details.

FULL COLOR COVER ADS, when available, are to be sized for full 8.125 x 10.75+bleed. 150 Line screens preferred. Must be submitted on CD in a digital format capable of being used by our printer. Color Match Proof, Color Key or Pre-printed tearsheet should accompany.

INSIDE DISPLAY ADS - Design & layout is available at no charge for advertising to be run in the *Repeater Journal.* Adobe Acrobat PDF proofs are available, upon request, for ads that we design.

DISCLAIMER: The *Repeater Journal* cannot be held liable or responsible for errors in advertising, or to the quality or accuracy of advertising claims.

Where to Submit Ads

All advertising copy and insertion orders should be sent to the Editors:

Tom Gallagher, N4IOZ
Repeater Journal Editor
410 East Sprague St
Winston-Salem, NC 27127-3108
(336) 499 - 7169 editor@sera.org

Ad & Copy Deadline Dates

Ad copy deadlines are normally the first day of the month prior to month of publication. The Repeater Journal cannot guarantee publication of any advertising that arrives after deadline unless prior arrangements are made with the Ad Department.

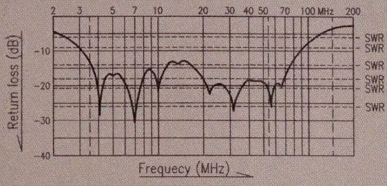
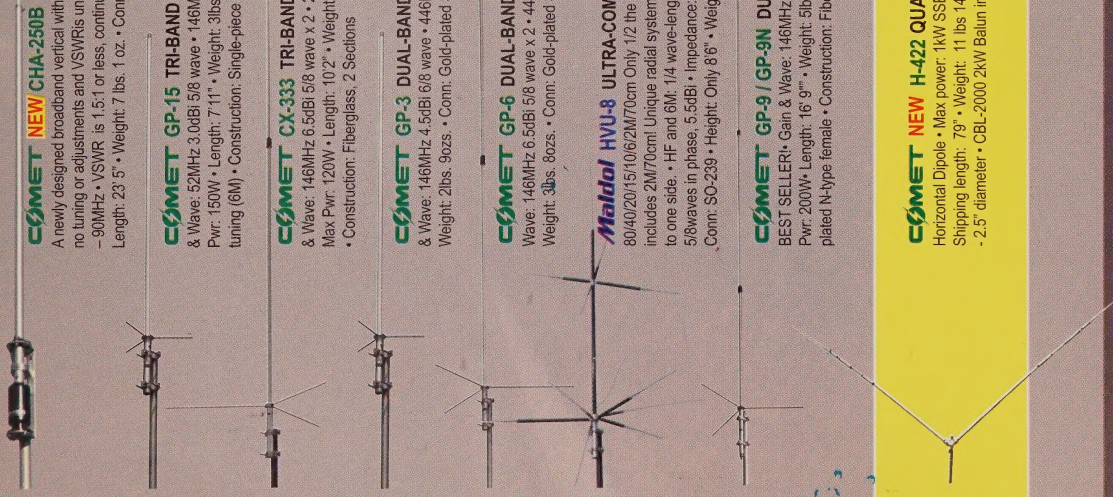
COMET and Maldol

Base Antennas



CHA-250B VSWR graph

"One person can effortlessly raise the antenna at night when no one can spot it, and take it down before daybreak. This antenna is also a great choice for portable operations, such as quick and easy mini-DXpedition to a campground or a nice tropical island! In short, the Comet CHA-250B is simple to assemble, painless to elevate and is easy on the eyes, while at the same time getting you on 6 meters thru 80 meters without the requirement of an antenna tuner and ground radials. You'll even be able to work some DX while you're at it!" – Dan Dankert N6PEQ



COMET NEW CHA-250B BROADBAND HF/6M GROUND-PLANE ANTENNA A newly designed broadband vertical with NO GROUND RADIALS. EXTREMELY easy to assemble, requires no tuning or adjustments and VSWRis under 1.5:1 from 3.5-57MHz! • TX: 3.5MHz – 57MHz • RX: 2.0 – 90MHz • VSWR is 1.5:1 or less, continuous • Max Power: 250W SSB/125W FM• Impedance: 50 Ohm • Length: 23' 5" • Weight: 7 lbs. 1 oz. • Conn: SO-239 • Mast Req'd: 1" – 2" dia. • Max wind speed: 67MPH

COMET GP-15 TRI-BAND 52/146/446MHZ BASE REPEATER ANTENNA Gain & Wave: 52MHz 3.0dBi 5/8 wave • 146MHz 6.2dBi 5/8 wave x 2 • 446MHz 8.6dBi 5/8 wave x 4 • Max Pwr: 150W • Length: 7'11" • Weight: 3lbs. 1oz. • Conn: Gold-plated SO-239• 2MHz band-width after tuning (6M) • Construction: Single-piece fiberglass

COMET CX-333 TRI-BAND 146/220/446MHZ BASE REPEATER ANTENNA Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 220MHz 7.8dBi 5/8 wave x 3• 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 120W • Length: 10'2" • Weight: 3lbs. 1oz.• Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

COMET GP-3 DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA Gain & Wave: 146MHz 4.5dBi 6/8 wave • 446MHz 7.2dBi 5/8 wave x 3 • Max Pwr: 200W • Length: 5'11"• Weight: 2lbs. 9ozs. • Conn: Gold-plated SO-239 • Construction: Single-piece fiberglass

COMET GP-6 DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 200W • Length: 10'2"• Weight: 3lbs. 8ozs. • Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

Maldol HVU-8 ULTRA-COMPACT 8 BAND HF/VHF/UHF VERTICAL ANTENNA 80/40/20/15/10/6/2M/70cm Only 1/2 the traditional size and weight of vertical HF antennas, and it includes 2M/70cm! Unique radial system rotates for balcony installations, the radials can all be rotated to one side. • HF and 6M: 1/4 wave-length • Gain 2M: 1/2 wave-length, 2.15dBi • Gain 70cm: Two 5/8waves in phase, 5.5dBi • Impedance: 50 Ohm • Max Power: HF 200W SSB • 6M–70cm: 150W FM• Conn: SO-239 • Height: Only 8'6" • Weight: 5lbs. 7ozs.

COMET GP-9 / GP-9N DUAL-BAND 146/446MHZ BASE REPEATER ANTENNA BEST SELLER!• Gain & Wave: 146MHz 8.5dBi 5/8 wave x 3 • 446MHz 11.9dBi 5/8 wave x 8 • Max Pwr: 200W• Length: 16' 9"' • Weight: 5lbs. 11ozs. • Conn: GP-9 Gold-plated SO-239 • GP-9N Gold-plated N-type female • Construction: Fiberglass, 3 Sections

COMET NEW H-422 QUAD-BAND HF DIPOLE Compact 40/20/15/10M "V" or Horizontal Dipole • Max power: 1kW SSB • Length "V" Dipole: 24' 3" • Horizontal Dipole: 33' 10" • Shipping length: 79" • Weight: 11 lbs 14 ozs • Wind Load: 3.02 sq feet • Required mast size: 1.5" - 2.5" diameter • CBL-2000 2kW Balun included • Simple installation, band tuning and profile change

ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

Coming soon to your authorized Icom dealer!
